Forecast for Monday 01 Jul 2024

Weather: Dry with clear spells overnight, before turning increasingly cloudy from the west by dawn, with outbreaks of showery rain. A band of showery rain, locally heavy, will move eastwards during Monday morning, clearing by midday. Becoming drier and brighter, with some brief sunnier spells developing in the afternoon. Turning cloudy from the west by evening, with outbreaks of patchy light rain and drizzle at times.

Maximum wind: West southwesterly 10-15mph at first, backing west northwesterly 15-20mph, with gusts 25-30mph during the afternoon.

Chance of cloud-free hill tops above 600m: 30% during the morning and late in the day. Generally 80% during the middle part of the day.

Low cloud and visibility: Cloud base lowering to 500m in showery rain during the morning, lifting to above the summits after midday. Lowering to 500m in rain and drizzle by the evening. Visibility will be poor at times, especially in low cloud and rain. Otherwise, generally good or very good visibility.

Temperature: **Valleys:** Plus 9 Celsius, becoming Plus 16 Celsius.
At 600m: Plus 6 Celsius, becoming Plus 10 Celsius.
Freezing level: Above the summits.
